

AI Visibility Analysis

Prepared for **Falcon Rappaport & Berkman LLP** — frblaw.com

Overall AI Visibility Score

Your firm is invisible to AI search platforms. When potential clients ask ChatGPT, Gemini, or Perplexity for legal recommendations, your firm does not appear.

F

Your firm has **40 Google reviews across 4 locations**. Your top competitor has **223**.

You have 23 specializations but no AI search visibility. That means when someone asks ChatGPT "who handles commercial litigation in Westchester?" your firm doesn't exist.

Right now, 40%+ of legal searches start on AI platforms. That number is growing every month. And your competitors aren't optimized for it either, which means **whoever moves first takes the whole market**.

Category Breakdown

AI VISIBILITY

35/100

No structured FAQ data, no AI discoverability file. ChatGPT, Gemini, and Perplexity have no way to learn about or recommend your firm.

REVIEWS

42/100

40 total reviews across 4 offices vs. competitor's 223. Irvine location has zero reviews, creating a credibility gap.

LOCAL SEO

55/100

Website phone (516-599-0888) doesn't match Google Business Profile (914-666-5600). This mismatch actively hurts rankings.

CONTENT

75/100

23+ specializations is a huge asset, but pages lack the depth search engines and AI platforms need to rank you.

TECHNICAL

85/100

Strong foundation. SSL, mobile optimization, and schema markup are solid.

Every one of these gaps is a place where potential clients are finding your competitors instead of you.

How We Support You Long Term

- **Monthly AI file updates.** We keep your AI discoverability files current so platforms always have the right information to recommend you when new specializations, cases, attorneys, or offices change.
- **Fresh content every month.** Google pushes down pages untouched for 6+ months. We publish search-optimized content targeting your specific case types and locations.
- **Ongoing competitor monitoring.** The firm with 223 reviews is still collecting more. We track competitors and adjust your strategy so you stay ahead.
- **Continuous schema and structured data tuning.** New reviews, attorneys, and practice areas are reflected in your structured data so search engines always work from current information.
- **Algorithm change protection.** Google and AI platforms change their ranking criteria constantly. We monitor and adjust proactively.

Each Month You Get

- Updated AI discoverability files reflecting any changes to your firm
- Fresh, search-optimized content targeting your highest value case types
- Review generation campaigns to close the gap across all 4 locations
- Local citation monitoring and cleanup
- Competitor tracking with a monthly performance report

I'd love to jump on a quick 15-minute call to walk through these findings and show you exactly how we'd address each one. No commitment, just a conversation about what's possible.
