

AI Visibility Analysis

Prepared for **Parian Law Firm** — westgalawyer.com

Overall AI Visibility Score

Your 4.9-star reputation is exceptional, but your digital infrastructure isn't keeping up. AI platforms can't find or recommend your firm.

F

You have a **4.9-star rating with 162 reviews**. That puts you in the top 1% of injury firms in Georgia for client satisfaction.

But here's the problem: none of that matters if people can't find you. When someone asks ChatGPT or Google AI "best car accident lawyer near Carrollton GA," your firm doesn't show up.

That means **lawyers with worse reviews and worse outcomes are getting the calls that should be going to you.**

Category Breakdown

AI VISIBILITY

15/100

No AI discoverability file, no structured FAQ data. AI search engines have zero way to learn about your firm or recommend you.

LOCAL SEO

35/100

No Avvo, Martindale-Hubbell, or Super Lawyers presence. These are the trust signals Google and clients use to compare firms.

CONTENT

40/100

No dedicated pages for "car accident lawyer Carrollton GA" or "truck accident attorney west Georgia." These are the exact searches clients make.

TECHNICAL

45/100

No schema markup for legal services. Search engines can't tell what you do, where you do it, or what case types you handle.

REVIEWS

78/100

4.9 stars with 162 reviews is exceptional. But no review showcase on your site and no structured markup showing that rating in search results.

GOOGLE BUSINESS

75/100

Strong rating, but website address doesn't match Google's verified location. This inconsistency hurts local rankings.

Your reputation is strong. Your digital infrastructure isn't keeping up with it.

- **Monthly AI file updates.** We keep your AI discoverability files current so platforms always recommend you accurately as case types, verdicts, attorneys, or service areas change.
- **Fresh content every month.** Google pushes down pages untouched for 6+ months. We publish search-optimized content targeting the specific case types and locations where injury clients search.
- **Ongoing competitor monitoring.** Right now nobody in your market is optimized for AI search. That won't last. We keep you ahead by continuously updating your data and content.
- **Continuous schema and structured data tuning.** New reviews, case types, and team changes are reflected in your structured data so search engines always work from current information.
- **Legal directory management.** Avvo, Martindale-Hubbell, Super Lawyers, and other directories need active attention. We keep all profiles current and consistent.

Each Month You Get

- Updated AI discoverability files reflecting new case results, attorneys, and services
- Fresh, search-optimized content targeting your highest value injury case types
- Review showcase updates and structured markup so your 4.9 stars appear in every search result
- Legal directory monitoring and profile optimization
- Competitor tracking with a monthly performance report

I'd love to jump on a quick 15-minute call to walk through these findings and show you how we'd tackle each one. No commitment, just a straightforward conversation.
